

Huntington Hills Facilitated Massage Therapy

Massage Therapist Bio:

Hello, my name is Felicia Yee.

My journey as a massage therapist began with covid, I had recently gotten laid off from my job as a bartender, which made me decide that it would be a suitable time to go back to school.

I decided to go into massage therapy because I am passion about helping people, and I have extraordinarily strong hands and have always been interested in muscles and anatomy.

I have since completed my year one and two of Massage School and I have since graduated ACMT (Alberta College of Massage Therapy with 2200 + hours with honors.

I currently work as a Registered massage therapist at a busy Chiropractic Clinic: **Northgate Physio and Chiro and Massage therapy**. At this clinic, the focus is helping people involved in a MVA (Motor Vehicle Accident, and other injuries) by providing treatment and goals to help regain their mobility back and decrease pain tension and stress.

At Northgate I was hired as a receptionist, but then got the opportunity of a lifetime when I was asked to be assistant to Dr Beth (chiropractor) and her physio team. During my time as an assistant, I was able to sit in on certain assessments, observations, and treatment plans for each patient, by doing so it has help me gain much knowledge on how to properly position a patient, and produce a treatment schedule base on the patient's injury's stress and imbalances that they are experiencing.

When the opportunity of having my own little space for my practice was offered, I immediately hopped onto that opportunity. So that is when I decided to open my own little mobile location clinic right here at Huntington Hills Community association. I will continue to upgrade my education in the hopes to provide more available and useful techniques to help facilitate this community. Stay tuned for more upcoming treatments that will be available in the future for the Huntington Hills Community Association

Thank you!
